KEYNOTE PAPERS

1 **Loading Vehicle BELFA** 1
~Development and experience gained in 10 years of practice~
Marc Gutermann*, *Carsten Schröder*
* University of Applied Sciences Bremen, Germany

2 **Overview and Application of Local Excitation Method(LEM) for Monitoring of Small Damage of Real Bridges**
Toshiyuki Oshima*, *Yasunori Miyamori*, *Shuichi Mikami*, *Tomoyuki Yamazaki*, *Sherif Beskhyroun**
* Kitami Institute of Technology, Japan
** The University of Auckland, New Zealand

3 **Railway Track Maintenance of JR East**
Atsushi Yokoyama*
* East Japan Railway Company, Japan

4 **Nondestructive Evaluation and Structural Health Monitoring**
Rosemarie Helmerich*, *Shuxian Hong*
* Federal Institute for Materials Research and Testing (BAM), Germany

5 **Global Health Monitoring System of Bridges in Finland**
Ilkka Hakola*, *Matti Halonen* and Petr Hradil*
* VTT Technical Research Centre of Finland, Finland

6 **A Platform for Mobile Visualization of SHM Data**
Matthew Woelk* , *Dean K. McNeill*
* University of Manitoba, Canada

7 **Development and Practical Application of a Health Monitoring System for Short- and Medium-span Bridges based on Public Bus Vibration**
Ayaho Miyamoto*
* Yamaguchi University, Japan

GENERAL PAPERS

1 (Thu-1) **Determining Load Resistance of Existing Concrete Bridges**
Risto Kiviluoma*, *Olli Pyykönen*, *Minna Torkkeli**
* WST Finland Ltd(Aalto University), Finland
** Finnsh Transport Agency, Finland

2 (Thu-2) **A New Impact Testing Method for Efficient Structural Flexibility Identification**

***Jian Zhang*[*]*, F.L. Moon*[**]

* Southeast University, China

** Drexel University, USA

3 (Thu-3) **Development of the Damage Level Sensor System for RC Railway Rigid ~Frame viaduct~**

***Hiroshi Hamada*[*]*, Tatsuya Nihei*[**]*, Noriyuki Miyamoto*[*]*, Masamichi Sogabe*[**]*, Yukihiro Tanimura*[**]*, Katsumi Yamazumi*[***]

* Keisoku Research Consultant Co., Japan

** Railway Technical Research Institute, Japan

*** JR Soken Engineering Co., Japan

4 (Thu-4) **A Sensor Network Data Structure for Centralized Postprocessing of Events and Trends**

***Joost Kuckartz*[*]*, Philip Collier*[**]

* The University of Melbourne, Australia

** Cooperative Research Center for Spatial Information, Australia

5 (Thu-5) **Minor Structural Damage Detection using Chaotic Excitation Technique**

***Tadanobu Sato*[*]*, Yasutoshi Nomura*[**]*, Chunfeng Wan*[*]

* Southeast University, China

** Ritsumeikan University, Japan

6 (Thu-6) **The Implementations of Damage Detection Scheme to a Skewed Bridge based on Health Monitoring and Numerical Evaluation**

***Gakuho Watanabe*[*]*, Fumiya Tomohiro*[*]*, Satoshi Goto*[**]*, Hisao Emoto*[*]

* Yamaguchi University, Japan

** Ube Machinery Corporation Ltd., Japan

7 (Fri-1) **Assessment, Repair and Health Monitoring for Concrete-Steel Deck of Highway Bridges**

***Andreas Triwiyono*[*]

* Gadjah Mada University, Indonesia

8 (Fri-2) **Health Monitoring of Short- and Medium-span Bridges using an Improved Modal Strain Energy Method**

***Parviz Moradipour*[*]*, Tommy H.T Chan*[*]*, Chaminda Gallage*[*]

* Queensland University of Technology, Australia

9 (Fri-3) **Automatic Data Collection System for Innovative Bridge Health Monitoring based on Public Bus Vibration**

***Akito Yabe*[*]

* KOZO KEIKAKU Engineering Inc., Japan

10 (Fri-4) **Fundamental Discussions for Practical Application of Health Monitoring System for Short- and Medium-span Bridges based on Public Bus Vibration**

***Hisao Emoto*[*]*, Hideaki Tanaka*[*]*, Gakuho Watanabe*[*]*, Ayaho Miyamoto*[*]

* Yamaguchi University, Japan
